**Subject: Expedited Waiver Request of Border to Border Communications, Inc. to Correct Study Area Boundaries Used in the Regression Analysis
WC Docket Nos. 10-90 and 05-337**

Ms. Dortch:

Pursuant to Sec. 1.3 of the Commission's Rules and Paragraph 29 of the Wireline Competition Bureau's Order, DA-12-646, in WC Docket Nos. 10-90 and 05-337 (released April 25, 2012), Border to Border Communications, Inc. ("Border to Border") respectfully requests an expedited waiver to correct the study area boundaries used by the Bureau in the regression analysis that established the initial "benchmarks" for Border to Border's high-cost loop support ("HCLS").

Accompanying this request is a thumb drive containing: (1) a study area map in an ESRI compatible shapefile format in accordance with Appendix C of the Bureau's April 25, 2012 Order; and (2) a Readme file containing contact information in accordance with the same Appendix C. The foregoing study area map shows the accurate boundaries of Border to Border's Texas study area.

This expedited waiver request is also accompanied by a certification under penalty of perjury from a Border to Border officer that the information provided accurately portrays the square mileage of Border to Border's Texas study area based on the most recent maps filed with the Public Utility Commission of Texas.

Good cause exists for grant of the requested expedited waiver because the actual boundaries of Border to Border's Texas study area are different from the boundaries used by the Bureau in its initial run of the regression model.

CERTIFICATION

I, Curtis H. Hunt, hereby certify the following matters under penalty of perjury:

1. I am an officer of Border to Border Communications, Inc. ("Border to Border"), and currently hold the office of Secretary/Treasurer.

2. I am familiar with the request being filed by Border to Border with the Federal Communications Commission for an expedited waiver to correct the study area boundaries used in the regression analysis that established the initial "benchmarks" for Border to Border's high-cost loop support ("HCLS"), and certify that the information provided with that request accurately portrays the square mileage of Border to Border's Texas study area based on the most recent maps filed with the Public Utility Commission of Texas.
